

Assignment 2: Design a database schema for a library system, including tables, fields, and constraints like NOT NULL, UNIQUE, and CHECK. Include primary and foreign keys to establish relationships between tables.

SQL Commands:

```
create table Authors (  
author_id number(10) PRIMARY KEY,  
name varchar2(50) NOT NULL  
);
```

```
insert into Authors values(3,'Harrley');
```

```
select * from Authors;
```

```
create table Categories (  
category_id number(10) PRIMARY KEY,  
category_name varchar2(50) NOT NULL UNIQUE  
);
```

```
insert into Categories values(3,'Love Comedy'); select *
```

```
from Categories;
```

```
create table Members (  
member_id number(10) PRIMARY KEY,  
name varchar2(50) NOT NULL,  
email varchar2(100) NOT NULL UNIQUE,  
phone varchar2(15) UNIQUE CHECK (phone != '0')  
);
```

```
insert into Members values(2,'aa','aa@gmail.com',0987654321);
```

```
select * from Members;
```

ORACLE Database Express Edition

User: SYSTEM

Home > SQL > SQL Commands

Autocommit Display 10 Save Run

```

create table Authors
(
  author_id number(10) PRIMARY KEY,
  name varchar2(50) NOT NULL
);

insert into Authors values(3,'Harley');

select * from Authors;

create table Categories
(
  category_id number(10) PRIMARY KEY,
  category_name varchar2(50) NOT NULL UNIQUE
);

```

Results Explain Describe Saved SQL History

AUTHOR_ID	NAME
1	Johnny
2	Bruce
3	Harley

3 rows returned in 0.00 seconds CSV Export
